Session 82: You Create Your Own Reality

Summary:

States of consciousness. These realities were created by man and exist around the earth plane. They exist in a state of energy and manifested and reproduced to the various realities as new earth entities entering the earth plane.

16:43 Speaks about being in a particular earth energy, you are subjected to all of its environment, illness, death, etc. due to walking within that plane. We basically created the consciousness of how to avoid death by creating the spiritual world creating reincarnation to change the reality and idea of dying and death. [Basically thoughts form things in in this case the collective belief creates the energy structure of this belief.] Basically, all the theories man has created for its existence those thought forms created that energy and therefore created the reality. That is why history repeats itself because the energy recycles from the beliefs of the humans. It is passed down through generations. Analogy of a tape that cannot be erased.

Discusses 47:41 contradictions and consciousness and not attachment
